

The following VM Solaris 11 image worked fine in VirtualBox until I applied the “updates” within the Solaris VM.. which gives me the following errors now on boot.. no longer working in VBox (see 3<sup>rd</sup> snapshot). Note that the “solaris-031913” image works, but not beyond that/those updates :

```
OracleSolaris11_11-11.1 [Running] - Oracle VM VirtualBox
